Vuex, Pinia, Redux, MobX
Next.js, Nuxt.js
MaterialUI, Bootstrap
Chart.js

Backend: Node.js, Express.js, AWS, Docker, Kubernetes
Databases: PostgreSQL, MySQL, NoSQL, GraphQL

Work experience

Senior Frontend Developer
Subbly.co | E-commerce platform
2023-11 - 2024-12

Subbly.co is a cutting-edge e-commerce platform designed for online marketplaces utilizing a subscription-first model.

My role is development of the platform, ensuring seamless user experiences for both merchants and customers

Responsibilities:
- Developed and maintained responsive, high-performance user interfaces with modern JavaScript frameworks.
- Worked closely with UX/UI designers and backend developers to translate business requirements into intuitive, visually appealing, and functional interfaces.
- Implemented features such as subscription management, payment processing, and dynamic content loading to support the platform's business model.
- Optimized web applications for speed and scalability, contributing to improved load times and reduced bounce rates.
- Participated in code reviews, ensuring code quality and adherence to frontend development best practices.

Lead Frontend Developer
Woki.one
2023-06 - 2023-12

Contributed to a universal CRM system, specializing in frontend development and team leadership. Key responsibilities:
1. Engineering:
   - Developed user-friendly frontend components.
   - Addressed architectural tasks for system optimization.
2. Team Management:
   - Led frontend team for timely code delivery.
   - Conducted code reviews and provided mentorship.
3. Features:
   - Implemented user-focused features.
   - Translated requirements into valuable system enhancements.
4. Refactoring:
   - Conducted codebase refactoring for maintainability.
   - Ensured adherence to industry standards.
5. Configurability:
   - Engineered a highly configurable CRM system.
   - Implemented customization features for user adaptability.

Fullstack Developer
Freelance
2023-05 - 2023-07

During my freelance work, I successfully delivered two projects:

Geo-spatial Data Web Service:
- **Developed a web service for visualizing geo-spatial data** extracted from numerous large KML files using the **Google Maps API.**
- Transformed and reformatted these files to make them compatible with the Google Maps API.
- Implemented features such as region and forestry separation, area search and filtration, and interactive map events for a comprehensive user experience.
- Leveraged a tech stack that included **Vue 3, PHP Laravel,** and **Tailwind CSS.**

AI-Powered Telegram Bot for Forest Fire Detection:
- **Developed an AI-powered Telegram bot that cyclically monitored a multitude of IP cameras located in Ukrainian forests to detect forest fires.**
- The project was implemented using **Python**, leveraging libraries such as **telegram-python, numpy,** and **TensorFlow** for real-time image processing and fire detection.

Frontend Developer
Capgemini Engineering
2022-05 - 2023-05

In my previous role, **I contributed to a significant big-data-powered project aimed at enabling marketing and analytics forecasting**. Our technology stack included **React, TypeScript, Redux,** and **Tailwind CSS**. The project infrastructure was organized as a **monorepository** managed with **Lerna**, facilitating efficient development and collaboration.

Frontend Developer
Malevich
2021-11 - 2022-05

In this role, I was involved in two distinct projects:

Delivery Company Back Panel:
- **Contributed to the development of a comprehensive back panel for a delivery company**. This encompassed a **CRM system**, **dashboards**, and **analytics services**.
- Utilized a tech stack that included **TypeScript, React, Next.js, GraphQL, Material-UI,** and **React Native** with **Expo** for the **mobile application** used by warehouse workers, equipped with a **QR code scanner.**

Equipment Quality Testers Control Panel:
- **Led the development of a control panel and client service from the ground up** for a company specializing in equipment quality testing.
- Leveraged technologies such as **React, Redux,** and **Node.js.**

Frontend Developer
Nerdville
2020-11 - 2021-10

Multilingual E-commerce Platform:
- **Collaborated on the development of a multilingual e-commerce platform featuring auction mechanics.**
- Worked on product and grid layouts, designed recommendation modules, and implemented a reviews section.
- Leveraged a tech stack that included **React, I18n, Redux, context,** and **Bulma.**

Sports Events Review Platform:
- **Making a redesign of a service dedicated to collecting a reviews** of a race events.
- Executed this project using **React, REST API,** and **Bootstrap.**

Junior Frontend Developer
Woman Insight
2019-03 - 2020-10

In this role, my responsibilities encompassed:

Maintaining and Developing Corporate Site:
Taking charge of maintaining and enhancing the corporate website built on **Vue** and **PHP Laravel**, ensuring its continuous improvement.

Implementing Marketing Automation Systems:
Successfully implemented marketing automation systems, integrating various services for ads, email marketing, telephony, and CRMs. This involved the use of **JavaScript** and **PHP** to streamline marketing processes.

Developing Custom Services:
Creating custom services, including online quizzes and tests using **Vue**, to meet specific business needs and engage users effectively.

Managing Complex Database:
Overseeing databases that serve multiple sales centers, hundreds of thousands of users, and handle millions of deals, using **SQL** to ensure data accuracy and system efficiency.

Education

Bachelor's degree
Odessa National Telecommunications Academy
The diploma degree was defended by a full-stack project on "CRM for a marketing agency"
Stack: Vue · Nuxt · NodeJS · Express.js · PostgreSQL

Languages

English, Ukrainian, Russian
